The Interactive Field

- A better term:
 - Reflects the idea of reciprocity and mutuality...
 - ...of a continuous process
 - Concerns all kinds of mutual relationships
 - The field is considered as a third entity

THE FIELD

The Interactive Field

Less a metaphor than a reality : a spatial reality

- It contains more than the sum of the 2 unconscious or than the sum of each person's contribution
- There is a separate entity which links the two other entities
- It contains something of each entity, but it is felt as separate from the conscious sense of self of either individuals

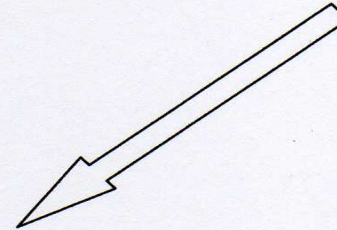

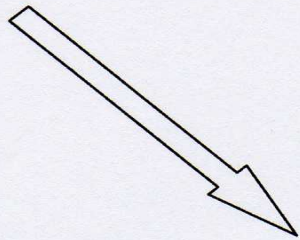

The relationship on the unconscious level is more fluid than on the conscious level.
